

# IntelliTrack®

Data Management Software

## Features:

- Maintains inventories in a variety of business environments
- Easy-to-use
- Customize IntelliTrack® in MS Access 2002
- Integrated bar code printing
- PSC portable bar code reader support
- Embed pictures in your database

IntelliTrack® data management software is designed to maintain inventory in a variety of business environments. This user-friendly inventory tracking system combines state-of-the-art bar code data collection on your portable data terminal, with a sophisticated Windows®-based inventory management program for your PC.

PSC's IntelliTrack® suite of products offers a relational database to ensure data integrity, portable bar code reader integration to maximize data collection efficiency, and bar code label printing capabilities to improve data collection accuracy.

With four specialized modules, the IntelliTrack® product line is designed to custom fit your operation. Choose the module that works best for you – Inventory, Fixed Assets, StockRoom, or Check In/Out.

IntelliTrack® 4.0 was created using Microsoft® Access 2002. Each IntelliTrack® module contains the source code and, since Microsoft® Access is one of the most popular development tools, you can easily customize your IntelliTrack® module to meet your specific requirements.

PSC is a leader in providing businesses with data collection and inventory management tools designed to reduce costs and increase productivity.

## Portable Data Collection

Each IntelliTrack® software module includes an integrated portable data collection application for the PSC Falcon®, TopGun®, and PT 2000® portable data terminals. Portable data collection applications allow you to perform many of the same functions found in the IntelliTrack® application for your PC, such as physical inventories, moving and tracking items, issuing or receiving stock, and more.

**Item Pictures:** Each IntelliTrack® product allows you to store a picture with an item definition. This feature allows a user to verify an item visually. This is especially helpful, for example, when a user might be checking out an unusual tool, verifying an asset, or identifying kits.

**Customization:** While IntelliTrack® will meet most users' requirements, situations may arise when you need to add features to IntelliTrack®. Since you receive the IntelliTrack® source code with each product, you can make customizations such as adding a new report or even adding new forms with special processing capabilities. For additional programming expertise, or just to save time, call PSC's Professional Solutions Team.

**Bar Code Printing:** Integrated bar code printing allows you to label your inventory and locations quickly and easily based on the data contained in your IntelliTrack® application. Portable data terminal support and bar code label printing maximize data accuracy and efficiency when collecting inventory information.

**Easy to Use:** IntelliTrack® is a user-friendly Windows® application. Easy menu navigation allows you to quickly perform common inventory tasks.

## IntelliTrack®

### MODULES

#### INVENTORY

Ideal for small to mid-sized environments, the IntelliTrack® Inventory module effectively maintains your inventory with physical inventory and cycle counting capabilities. Powerful utilities, such as a move and edit feature, allow you to keep up with the demanding pace of a warehouse environment. Use the built-in reports and queries to monitor and manage your inventory.

IntelliTrack® Inventory comes with these standard reports:

- History by Date
- Inventory by Location
- Inventory Item Summary
- Overstock Summary
- History by Item
- Inventory by Lots/Expiration Dates
- Inventory with Pictures
- Reconciliation
- Inventory by Category
- Inventory Item Detail
- Inventory, Negative Quantity
- Reorder

#### FIXED ASSETS

Use the IntelliTrack® Fixed Assets module to track and monitor the location of your company's fixed assets. IntelliTrack® Fixed Assets module also has the ability to maintain depreciation data for individual assets. Fixed Assets tells you not only where an asset is, but how much it is currently worth.

IntelliTrack® Fixed Assets comes with these standard reports:

- Move Transaction by Asset
- History by Asset Number
- Inventory by Item & Pictures
- Inventory by Item Number
- Inventory by Site/Location
- Assets by Alternate Part Number
- Assets Not Inventoried
- History by Date
- Inventory by Category
- Inventory by Ownership
- Class Definition
- Assets without Item Definition
- New Assets
- Inventory by Asset Number/Detail
- Inventory by Department
- Inventory by Serial Number
- Depreciation by Asset

#### STOCKROOM

Manage consumable inventories with the IntelliTrack® StockRoom module. StockRoom allows you to issue and receive items to and from individual employees and departments, giving you the ability to track item usage and billing information. Use the powerful usage and billing reports to identify inventory trends, giving you better capabilities to manage your inventory.

IntelliTrack® StockRoom comes with these standard reports:

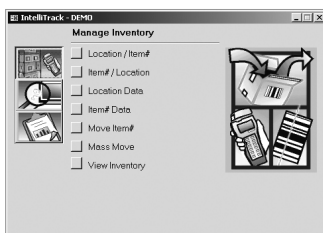

- History by Item
- Inventory by Location
- Inventory with Pictures
- Issue Transactions
- Receipt Transactions
- Inventory by Category
- Inventory Item Summary
- Inventory, Negative Quantity
- Overstock Summary
- Reconciliation
- Inventory by Lots/Expiration Dates
- Inventory Item Detail
- Issue Number
- Receipt Number
- Reorder

#### CHECK IN/OUT

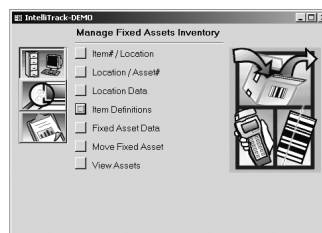

The IntelliTrack® Check In/Out module manages material and equipment check-in and check-out transactions, and manages your consumable stock. Great for internal libraries, audio/video departments, tool cribs and document rooms. Check In/Out is a powerful tool to manage circulating inventories.

IntelliTrack® Check In/Out comes with these standard reports:

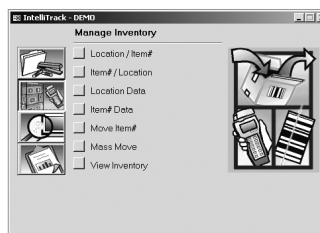

- Check In/Out – Inventory Details
- History by Date
- Inventory by Location
- Inventory Summary
- Issue Number
- Receipt Number
- Rental Billing Report by Transaction Number
- Rental Cost by Department
- Retired Items
- Check In/Out – Inventory Summary
- History by Item
- Inventory by Lot/Expiration Date
- Inventory with Pictures
- Issue Transaction
- Receipt Transactions
- Rental Cost by Employee
- Usage by Check Out Item
- Check In/Out – Past Due
- Inventory by Category
- Inventory Item Detail
- Inventory, Negative Quantity
- Overstock Summary
- Reconciliation
- Rental Cost by Account
- Rental Cost by Order
- Usage by Item Number
