# DCP 100 Entry Level ID Card System

### EDISecure™ DCP 100 ID Card Entry-Level System

This package provides you with everything you need to get started with badge production right away. Image capture is easily accomplished via the included smart web camera and sturdy tripod. The EDISecure™ Card Management Software *Standard* edition is intuitive to operate and helps you create your own professional looking card designs in minutes from the included fancy sample layouts. The software is available in six standard languages - English, French, German, Spanish, Portuguese and Italian - as well as two special languages, Arabic and simplified Chinese. The DCP 100 direct ID card printer included in this package can print one or both sides of a card on demand. The printer comes with a convenient card dispenser that keeps blank cards dust-free until ready for use, plus the printer has a very small footprint, making it easy to use anywhere space might be in short supply (like your desktop!). And so you can start making badges immediately, a starter kit of consumables, consisting of 50 PVC cards and a color ribbon cartridge for 100 full color cards, is included in this package. This system is available with or without an integrated magnetic stripe encoder. For low-cost, text-only printing, an optional resin black monochrome ribbon is available (500 prints per monochrome ribbon).

The investment required to purchase this package is very minimal, and additional costs are avoided because the system requires no field service and support.

### Feature List for the EDISecure™ Card Management Software *Standard*

#### General

- Runs under Windows 98/Me and Windows NT/2000/XP
