

# TSP2000 Series Thermal Printers

The TSP2000 thermal printer offers a wide variety of features at an affordable price. Designed for virtually any point-of-sale (POS) application, the TSP2000 is compactly designed to fit in even the smallest footprint, comes in putty and charcoal and is extremely user friendly.

The TSP2000 has a "drop-in-and-print" paper handling system that makes loading paper very easy. The printer also has an easy-to-change interface cartridge that allows the printer to switch between serial and parallel interfaces. Options include an external power supply and wall mount bracket. A built-in "flash ROM" gives the printer expanded print options including a user-friendly logo store utility.

Despite its economical price, the TSP2000 provides high-end performance and is covered by our industry famous three-year warranty, the longest protection available for any printer on the market.

## Features:

Very low cost & small foot print

Easy load "Drop-in & Print" paper loading
